ATTORNEY ASSISTANT

AI in the Legal Space

The Future of AI in Legal Operations

Prediction

AI will significantly change business processes in the next 3 years

Significance

Like the iPhone revolutionized technology, AI will transform legal tasks.

Example Application

A staffing company will use recorded calls to train AI to eventually replace the human receptionist

Future AI Operations

Contract drafting, email automation, calendaring, and client communication.

AI Tools

- **EvenUp** - demand letters
- **Spellbook.ai** - contract drafting

AI & THE FUTURE

01

INITIAL FOCUS

AI will start by replacing Internal, low risk functions

02

ROLES

AI can automate:

- appointment setting
- staff training
- quality assurance

03

BENEFITS

Enhanced efficiency, improved call quality, better onboarding, and marketing insights.

04

INTEGRATION

The various roles of AI will function as multiple "smart legs" forming a cohesive system

05

GOAL

Optimize internal processes and client interactions, reducing cost & increasing efficiency.
